

ALUMASTER Terrace Glazing System C640

Panes at aluminium frame are sliding on the main frame rail. Rail may be of 2 or 3 tracks, depending on the number of moving parts and the individual customer preferences.

Number of parts and tracks is chosen according to the desired opening space of the balcony. The system is convenient because it is fully opened and locked inside the balcony so it does not take up space. Pane cleaning is safe and convenient as glazed parts are easily removable and is also easily re-inserted.

Main features:

- Minimal maintenance;
- Reduces noise in the premises;
- Long operating time;
- Aluminium profile minimally responds to temperature fluctuations;
- Protects against wind, rain, etc;
- The system uses 4mm or 5mm glass. (Clear, tinted, tempered, etc.).
